QUALITY AND ENVIROMENTAL POLICY AND FOR THE HYGIENE-HEALTH SAFETY

IDEALPLAST, founded in 1978, produces high quality polyolefin based flexible films for applications primarily in the food, industrial and hygienic-sanitary sectors. IDEALPLAST aims to provide packaging that conforms to the highest quality standards and has implemented a quality, environmental and hygienic health and safety management system compliant with ISO 9001, ISO 14001 and BRC-GS standards to pursue continuous improvement.

All IDEALPLAST staff must feel involved in pursuing this policy, which includes:

- production flexibility;
- continuous improvement of the product, of the processes efficiency and of the quality management system, of hygienic and sanitary safety and of the environmental management system to increase environmental performance;
- customer satisfaction in compliance with the agreed product specifications;
- monitoring of waste and defects;
- commitment to environmental protection, including pollution prevention;
- continuous improvement in waste management;
- reduction, as far as possible, of the use of natural resources in relation to the volume produced;
- commitment to comply with its compliance obligations;
- guarantee of compliance with current regulations and health and hygiene safety regarding food contact materials;
- active internal and external information channels regarding environmental management and the activities and actions that IDEALPLAST adopts to safeguard the environment;
- improvement of the environmental awareness of all interested parties;
- use of high-performance technological systems to constantly improve energy efficiency;
- development of an integrated management system planning that reflects the objectives and aims established annually by the General Management;
- periodic review of this policy and of the integrated management system to identify weaknesses and pursue continuous improvement.

This policy must allow IDEALPLAST to compete with the best companies in the sector to ensure sustainable development, profit and the achievement of objectives related to the environment, quality and health and hygiene safety. All the objectives, principles and values mentioned involve every business function. The clear and measurable objectives of the integrated management system are defined within the first few months of each year. The objectives are periodically reviewed to verify their congruence with the company reality and the state of implementation. This policy must be communicated to all staff, made known to suppliers and made available to anyone who requests it.
